

Champion a healthier learning environment

GOJO® Hand Hygiene Program for Schools

Hand hygiene is essential to a healthy learning environment

But how do you fit this critical program into a busy school day?

Illness is responsible for more than **144 million lost school days** per year¹. Absenteeism can cause lost learning opportunities that impact student achievement.

Absenteeism robs students of learning time.

One of the challenges you face in helping kids achieve their fullest potential is keeping students ready and able to learn; and staying off the absentee list. According to the Centers for Disease Control and Prevention, hand hygiene is one of the most important steps in preventing illness and stopping the spread of germs to others.

Hand Hygiene – Vital to success but difficult to achieve

With all the demands of a busy school day, proper hand hygiene isn't easy. Soap and water may not be available in the classroom, and restroom visits after each cough or sneeze aren't practical. **Studies show only 53% of students wash their hands after bathroom use and only 18% use soap**².

The GOJO® Hand Hygiene Program for Schools

A smart start for learning

Lessons learned:
**A 51% reduction
in absenteeism⁴**

In a study conducted in schools, absenteeism caused by illness was 51% lower in classrooms that used PURELL® regularly and implemented a hand hygiene educational program versus classrooms that did not.

Easy-to-use GOJO® hand hygiene solution supports your commitment to achievement

GOJO makes Hand Hygiene as easy as 1, 2, 3.

1. PURELL®, America's #1 instant hand sanitizer, makes it easier to create your healthy learning environment.

The touch-free dispenser and a foam formula encourage use. Place it in classrooms, lunchrooms and other shared areas. PURELL kills 99.99% of most common germs that may cause illness.

2. GOJO Foam Soap has a soft feel kids love – and that encourages use.

GOJO Green Certified Hand Soaps

GOJO's highly effective and environmentally preferred hand soaps help support a clean environment with environmentally responsible packaging and formulas. Certified by Green Seal and by EcoLogo™.

GOJO refills are SANITARY SEALED™

Why? A recent study by the University of Arizona on refillable bulk soap reservoir systems showed that 25% contained potentially harmful bacteria³.

GOJO factory-sealed refills are protected from contamination and each include a fresh nozzle.

3. GOJO® innovative educational materials help make wellness an everyday lesson.

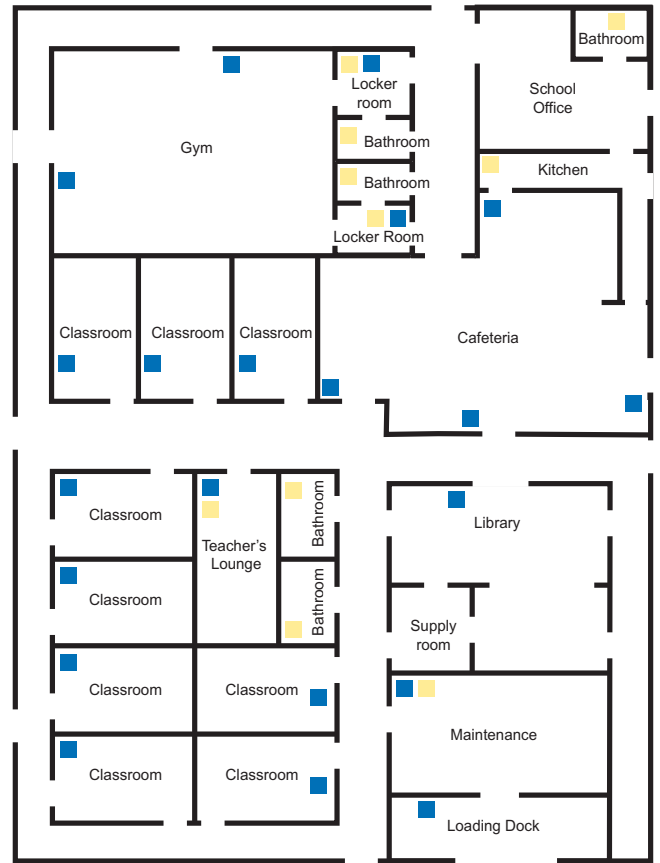

The GOJO Hand Hygiene Program includes educational materials to make hand hygiene a regular part of your busy school day. Hand hygiene posters are available to use in classrooms and common areas. And GOJO has created curriculum for grades K-5 to teach proper hand hygiene and its importance. Our smart and fun-loving character – CLEAN GENE™ helps educators lead kids through memorable learning activities. Activities and other educational materials are available for download at <http://education.GOJO.com>
